

WASH YOUR HANDS PROTECT YOUR HEALTH

T.R. MINISTRY OF HEALTH

New Coronavirus is a virus causing respiratory tract infection.

The most common symptoms are fever, cough and respiratory distress

Stay away from the crowd as far as possible in order to be protected.

Wash your hands with water and regular soap for at least 20 seconds.

Wet your hands thoroughly and rub the soap over all the surfaces of your hands.

Thoroughly scrub the palm side and the back of your hand.

Rinse your hands with plenty of water

Turn off the top with the paper towel you used

WASH YOUR HANDS PROPERLY
